

**BIO
GROW**

The substrate created by growers for growers

Biogrow is **number 1 in cocopeat substrates**. We produce **ecological and efficient** substrates for soilless culture systems across the world.

Biotechnology, the engine of our development

French growers at the service of worldwide crops.

The brand Biogrow belongs to French fruit and vegetable growers. Our producers have been enriched by the practice of hydroponic culture and their experience of organic substrates, and therefore developed **a wide range of coco peat substrates**.

On their own production sites in Brazil, India and Sri Lanka, **they are developing efficient and completely renewable substrates in collaboration with biotechnology researchers**. These substrates satisfy consumers' growing requirements for eco-responsibility since they are the cleanest and most renewable substrates to be found in the market.

QUALITY

DEMANDING
QUALITY APPROACH

Biogrow creates innovative substrates **derived from biotechnology** and complying with very demanding quality criteria. **Rigorous and standardized quality controls are applied** by Biogrow to ensure that the substrates deliver the same level of performance in all the sites.

OUR PRODUCTS

... ***tailor-made***
substrates

COCOPEAT

*Cocopeat is the sole organic component of **Biogrow substrates**.*

› ENVIRONMENTAL PROPERTIES

› 100% natural, completely recyclable and renewable.

› PHYSICAL PROPERTIES

› The buffering capacity and excellent water diffusion capacity, and a high rehydration capacity.

› TECHNOLOGICAL PROPERTIES

› A full range that has been developed by our technicians to meet your needs precisely.

DUO

- › An innovative product
- › Completely renewable
- › A well-balanced air/water ratio
- › Either generative or vegetative depending on the climate

AIR

- › The substrate has high aeration
- › High drainage capacities
- › More generative substrate and used mainly in temperate oceanic climate

NATURAL

- › Has excellent water retention
- › Maintains good drainage and aeration
- › More vegetative and more generative action in winter since it offers suitable aeration

OUR SERVICES

DELIVERY

RELIABLE LOGISTICS WORLDWIDE

- › An integrated transport chain.
- › From the selection of raw materials to your warehouses, Biogrow manages the transport of your substrates whatever the mode of transport and the country of destination.

CUSTOMER

CUSTOM-MADE AT EACH STAGE

- › A substrate customized to your practices and production tools.
- › A unique flexibility delivering solutions to all your problems regarding crops, climate, density and irrigation.

SUPPLY

GUARANTEED CONTINUOUS SUPPLY

- › 4 production sites situated in Brasil, Sri Lanka and India produced by over 20 000 hectares of plants over 3 countries.
- › 8 million soilless culture bags each year to guarantee permanent supplies.

NEW

Biogrow™

NEW PROPOGATION
CUBES

We have developed **organic propagation cubes made out of cocopeat**, in partnership with renowned nurseries in France and Netherlands. Biogrow offers you now **100% Natural growing cubes**.

Biogrow grow-cubes bring the **perfect combination with our substrates** for excellent rooting conditions.

The block composition is made with **cocopeat particles carefully** selected for professional nurseries.
